

## Two-factor authentication (2FA)

### Emergency deactivation key

**What is it for?** You can use this code to turn off two-factor authentication.

**If you lose it** You can generate a new key at any time using two-factor authentication. In case of loss we advise you to generate a new key.

- **Key:** GMeXqjrEQd

### OTP generator configuration

**What is it for?** You can use this Code, or the QR Code, to configure the OTP generator on other devices.

**If you lose it** To configure other devices you will need to turn off two-factor authentication and run the activation procedure again.

- **Code:**
